MUMMY OF TUT-ANKH-AMEN RICH IN GEMS

PHAROAH'S FEET ADORNED WITH SANDALS OF GOLD

Difficulties of Explorers' Described and Many Rare and Interesting Objects Brought To Light—No trace of Documents Have Been Discovered—Visits To Tomb and Laboratory Suspended.

must necessarily proceed slowly. The cleaning and restoration of these wonderful objects will begin immediately after the examination of the mummy is finished. For this reason, and in order that they may be transported to the Cairo Museum for exhibition as quickly as possible, all visits to the tomb and the laboratory must be suspended until the work is finished."

OFFICERS OF HEBER CHAPTER EASTERN STAR

An official communique issued by the Ministry of Works describes the difficulties encountered in the examination of the body of Tut-Ankh-Amen, in Egypt, and the many rare and interesting objects brought into the light of day. The body was not removed from the coffin, but the wrappings were cut away, exposing the mummy, which proved to be that of a male, not adult. The communique says:

"On November 11, in the presence of the government and scientific representative, Howard Carter began the examination of the mummy of Tut-Ankh-Amen, which was carried on in Situ, since the mummy could not be removed from the coffin without injury.

"The outer surface of the wrappings which were in a very fragile condition were first consolidated by means of a thin, coating of melted paraffin wax after which Professor Derry made a longitudinal incision from mask to feet. The outer coverings, on being turned back, exposed a layer of wrappings which were equally carbonized an orderly unwrapping was main- and orderly unwrapping was manifestly impossible.

"As the work proceeded a large number of interesting and beautiful objects were gradually revealed. At each stage of the proceedings both written and photographic records were taken. Among the objects brought to light the more important were amulet and collar, a superb gold dagger with crystal handle, bracelets of intricate workmanship, a larger number of finger rings of diverse materials, some having scarbs bearing the king's name for their bezels (settings); a second dagger even more beautiful than the first, several large inlaid pectorals, beadwork ornaments, gold circles, etc.

"Until the 13th, the work of uncovering the mummy had proceeded only so far as to expose the lower part of the body and limbs. According to the opinion of the anatomical experts, the evidence to the present reveals without doubt that the body is that of a male, not yet adult, in a much-embalmed condition.

"Carbonized on the feet are golden sandals and upon each toe and finger golden stalls. So far no trace of documents has been discovered.

"Both forearms were loaded with magnificent jewels. The jewelry discovered upon the king, who lies in a coffin solid gold is far beyond expectations.

"Work of such a delicate nature

EASTERN STAR MEETING.

The Past Matrons' and Past Patrons' association of the 23d district of the Order of the Eastern Star meets at Williamsport Wednesday evening. Supper will be served in the Community house at 6 o'clock. It is no invitation affair and all matrons, past matrons, patrons, past patrons and their husbands and wives are eligible to attend.

Al Is a Self-Start.

A story from Washington is to the effect that the Democrats will boom Al Smith for president. Al seems to be doing a pretty fair job of it himself.—New York Commercial.

Inquiring To Know.

Business men and statesmen put themselves on record in Chicago as not having touched liquor since the country went dry. When was that?—Detroit News.

Pretty Soft For Roy.

At the rate he is being helped, Federal Prohibition Commissioner Haynes won't have anything to do but sign the pay roll pretty soon.—Indianapolis News.

Miss Vallie Groom of Burlington, N. C., who on her seventeenth birthday has just taken a business position, claims the championship of America in the matter of school attendance. For eleven years and three months, in grade, high and business school, she was neither absent for a day nor tardy.

MISS ELLA STONG INJURED.

Miss Ella Stong, who makes her home with Judge and Mrs. I. N. Abernethy fell in front of the Elks Home on North Court street Saturday evening and suffered painful sprains of the muscles of her limbs. Fortunately no bones were broken. She was assisted to her home and Dr. Howard Jones, was called to attend her. She is getting along nicely at last reports.

Druse Tribesmen Who Are Fighting the French

These first pictures from Syria since the violent outbreak of the Druse rebellion against the French there show a number of the mounted Druse warriors on the road to Damascus, and the famous Sultan Pasha Altrach, their leader, who attacked a French tank single handed and killed its crew.

DEATH'S TOLL OVER WEEKEND IS FOURTEEN

Many Others Injured in Traffic and Grade Crossing Accidents in State.

Columbus, O., Nov. 16, (UP).—Fourteen persons were killed and a score injured, three perhaps fatally in traffic and grade crossing accidents throughout the state over the weekend, a survey by the United press today disclosed.

Four were killed near Columbus when a Norfolk & Western train demolished their car at a grade-crossing. Five fatalities were recorded in other sections of the state.

The dead:—

Edna Loretta Tope, 14, Valley Crossing.

Bernice Marcella Tope, 16, Valley Crossing.

William Barnhill, 22, Obetz Junction.

Mrs. Margaret Barnhill, 21, Obetz Junction.

Mrs. Mary A. Sweeney, 69, Cincinnati.

Thomas Williams, Warren.

Henry W. Christensen, 38, Detroit.

Mrs. Omar Jameson, 32, Akron.

Henry Robinson, 64, Stow Corners.

Mr. and Mrs. Andrew Jackson, Hickory Corners, killed when their car was struck by a Lake Shore Interurban near Fremont.

Mrs. Mary Hirth, Akron, killed at Cleveland when the Hirth car was struck by a Pennsylvania passenger train.

GUSTAVUS GROOM HURT.

Gustavus Groom, son of Mr. and Mrs. George G. Groom, and a student in the high school while playing on the high eleven last Friday was injured. An examination by an X-Ray at the office of Dr. C. E. Bowers showed that he had sustained two fractures of the right forearm.

THE SICK.

Reports from the bedside of Dr. Carl Ritz, who is a patient at Mt. Carmel hospital, Columbus, are that he is getting along as well as could be expected.

Mrs. A. A. Parrett is confined to her home with a siege of the grip.

'Nother Mystery in Gotham.

Since it appears that Senator Walker, who received 748,030 votes for mayor of New York and Mr. Waterman, who received 316,449 votes, are both going to Florida, the question arises what the election was about.—New York Times.

POSTAL CLERK BADLY INJURED IN COLLISION

Leon Van Vliet Thrown Through Windshield When Truck Struck His Car.

Leon Van Vliet, mail clerk and parcel post messenger, was severely injured in a collision at the intersection of West Mill and Western avenue Saturday afternoon about 2 o'clock.

Mr. Van Vliet was driving west on Mill street and at the corner of Western avenue he met and collided with a truck driven by Jesse Dawson going south on Western avenue. When the two cars met, the force of the impact was so great that Mr. Van Vliet was jerked from his seat and went thru the windshield of his car and fell beneath the truck.

He was severely cut about the face, an ugly hole was cut in the top of his head and his right arm was badly cut and bruised. The injured man was assisted to his feet and was taken to the office of the Mid-West Paper company where he was given first aid by Dr. H. D. Jackson and Dr. B. R. Bales.

Mr. Van Vliet was badly stunned and so dizzy from the sudden shock that he sustained, that he was bewildered for a few moments, but soon came to himself when he reached his home on West High street, to which place he was taken in Dr. Jackson's car.

His condition Monday morning was much improved and it is thought will make a complete recovery. In speaking of the collision to officers of the police department, Mr. Dawson, of the firm of Woodring & Dawson, who was the driver of the truck admitted it was his fault. The firm operates a service station on Western avenue. Both the truck and Mr. Van Vliet's car were put out of commission in the collision.

Use Old Well to Cool City's Drinking Fountain

Decatur, Ark.—The old oaken bucket, with its iron-bound staves of the days prior to the discovery of germs, has become an outlaw, but the old town well that went with it here and which did valiant service in the pre-germ days is being harnessed to the necessities of modernity.

The town well is to be used as a cooler for a modern, sanitary drinking fountain. Pipes from the town water works are being laid to the well, and a coil reaching to the bottom is to be placed inside the shaft and under the water. Water from the waterworks will run through the pipe and thence to a drinking fountain on the busiest corner in the town.

A THREE WAY COLLISION.

The machine of J. Scharenberg, parked on Franklin street, headed east, the car of Floyd Seymour, in front of the postoffice, collided just as a car driven by Frank Shoemaker turned in on Franklin street from Court and the three came together. Mr. Seymour was backing his car into the street from the curb, and claims he did not see Shoemaker coming when he backed out. All three machines were damaged to some extent. The accident happened Saturday afternoon.

LIBERIA HIS FIELD

Harvey S. Firestone, who says the Firestone Plantations company, of which he is president, will invest \$100,000,000 in developing its rubber concession in Liberia and eventually will have 1,000,000 acres of rubber trees growing on what is now only bush and jungle.

Name Winnipeg Street for 3 Heroes in Block

Winnipeg, Man.—The bravery of three Winnipeg warriors who fought with the Canadian forces during the World war will be impressed upon posterity with a permanent memorial. It was recently discovered that three of Winnipeg's sons who earned the Victoria cross had lived on the same street within a block of each other during peace times. Residents of the street petitioned the civic authorities for permission to change the name of the street to "Valor road."

The request was granted, and a memorial lamp has been unveiled at an intersection of the newly named street. Only one of the three returned after the cessation of hostilities, Lieut. Robert Shankland. The other two, F. W. Hall and Leo Clark, paid the supreme sacrifice.

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices.

Appointed Administrators

Benjamin Valentine and Elizabeth Ellery have been appointed administrators of the estate of James Valentine deceased. The estate is estimated to be worth \$2,600 of which \$1,100 is personal. Charles Gussman, Luther Noggle and John Steiger have been appointed appraisers.

Appointed Guardian.

Herman Downey has been appointed guardian of his daughter, Muriel Downing, a minor, who was recently bequeathed a sum of \$1,200 by an aunt.

Foreclosure of Mortgage.

The Scioto Building & Loan association has filed a civil action against Reuben Peterson and Cora E. Peterson for foreclosure of mortgage, amount claimed \$61.49 with interest on \$48.52 from November 1, at 7 per cent. S. C. Gamble represented the plaintiff.

Released on Bond.

William better known as "Red" Mounts, was brought in Saturday morning by Sheriff Young on the charge of contributing to the delinquency of two girls, Dorothy Crosby and Stella Conrad, now inmates of the State Industrial school at Delaware. He appeared before Judge Adkins in juvenile court and was released on bond of \$600 for his appearance Friday, November 20, when he will be given a hearing.

Election Contest.

In the matter of the proposed bond issue to enlarge school building already erected by constructing thereto a fireproof addition, in the sum of \$30,000 in Monroe township C. C. Hanawalt, a taxpayer, has given notice of his intention to contest the election and to oppose the bond issue. The notice has been filed in the court of common pleas, thru his attorneys, J. D. Fisher and Abernethy & Simkins against the election board of Pickaway county.

Suit For Divorce.

Sallie M. Hamilton has filed a suit in probate court for divorce from Harry C. Hamilton. The parties were married July 16, 1908 in Williamsport. The couple have no children. She charges her husband with extreme cruelty. She asks to be restored to her maiden name, Sallie M. McColister, and also that she be decreed her real estate free of his dower interest. I. F. Snyder represents the plaintiff.

Prisoners Paroled.

Walter Greenlee and Rowe Gussman convicted some three months since of contributing to the delinquency of Stella Conrad and Dorothy Crosby were released on parole Saturday. Greenlee is to pay the fine of \$300 assessed against him at the rate of \$25 a month and Gussman his fine of \$300 at the rate of \$10 a month.

Marriage Licenses

Cecil Kuhn, 22, machinist, and Rose Myers, 17, both of this city. Rev. O. L. Ferguson.

Everett Hawk, 21, farmer, South Bloomfield and Ellen Holland, 17, Circleville.

GRABBED 440 VOLTS.

Roscoe Dunn, employed by the Columbus Light & Power plant, near Shadeville was severely burned Friday afternoon when he grabbed some wires which he supposed were dead and received a shock of 440 volts. His hands and fingers were badly seared by the electricity. Dr. D. V. Court-right is attending to his injuries.

Where It Is Most Needed.

We are told that more education is needed for law enforcement. How would it do to try a little more as a preparation for law making?—Cleveland Times-Commercial.

Protection Needed for Wintering Bees

Strong Cold Winds Are Always to Be Feared.

Already we have started to worry over the number of colonies we are going to winter successfully. It is time now to find some way to prevent winter losses and cease worrying.

If our fall management has been correct, we should now have strong colonies with at least fifty pounds of our best honey for winter stores.

Some natural protection is of great value. In locating our apiaries, the windward side can be protected by a thicket, a hedge, a building or a rough board fence. Strong cold winds are so much more chilling than calm days.

Now we have gone one step further and provide an insulation for our colonies. With four inches of dry planer shavings or leaves on all sides, six on top and four to six below, we can help a lot to keep a uniform temperature within the colony. Uniform temperature tends to decrease the colony activity in winter and decrease the honey consumption. Dry planer shavings are inexpensive and provide a first quality packing.

Colonies should be packed singly, in twos, or fours. Larger numbers, close together, cause drifting in spring and necessitate too much moving. Packing, well done will reduce those heavy winter losses.—R. G. Richmond, Department of Entomology, Colorado Agricultural College, Fort Collins.

Protein for Poultry Is Necessary to Get Eggs

An experiment conducted by the poultry department at South Dakota State college, shows that although milk is a substitute for meat mash, if both the meat mash and the milk have to be purchased, the meat mash will supply the necessary protein to the chicken for less cost. A point in favor of the milk, however, is that it keeps the fowls healthier. The lactic acid in the milk seems to act as a tonic.

To combine the advantages of the two feeds, when both have to be purchased, it is advisable that the meat mash be wet with warmed milk or with the commercial semi-solid buttermilk diluted with warm water. This combination will cost but very little extra and will keep the chickens in good health.

In conducting the experiment, three flocks of 30 chickens each, were used. The semi-solid buttermilk was fed to one lot; the meat mash to the second, and buttermilk and meat mash to the third. All three flocks were also fed the regular scratch feeds. Practically the same number of eggs were laid by each flock during the time the experiment was carried on.

Free Chickens of Vermin Before Putting in House

Be sure the birds are clean and the poultry house free from lice and mites before putting birds in their winter laying quarters, say poultry workers of the Pennsylvania State college. A salve made of equal parts of blue ointment and grease, mixed well together, may be applied under the wings and around the vent, using a piece about the size of a pen, or any good lice powder, such as sodium fluoride, may be used. Use a coal tar disinfectant as a spray, forced into cracks and crevices, to free the houses of insect pests.

Fit Runts for Market

Runts in the growing flock should be separated from the rest and pushed for market. They will grow much faster if they have comfortable quarters to themselves, as the other fowls often intimidate and abuse them. If kept separate and well fed they will be surprised to see how fast they will grow and round out. But do not make the mistake of putting them back into the adult flock again. Once a runt, always a runt. The only proper use for such fowl is to market them just as soon as they are fit.

Dieted Cows Give Most Milk

By dieting his cows so that they received only sufficient rations to properly sustain them instead of "all they could eat," a farmer at Urbana, Ill., has obtained more milk per cow than heretofore. The saving on feed was considerable in addition to the increased milk which rose from 16,152 pounds per month to 11,127 pounds. The change turned a loss of \$2 into a profit of 80 cents per cow.

FARM FACTS

Don't forget to save plenty of farm and garden seeds.

If you don't cover the ground in the garden the weeds will.

See that plenty of ventilation is provided in the storage cave.

Trees make our homes, schools and cities more beautiful. Plant them.

Potatoes should be emptied and not dropped or dumped into the storage.

If potatoes are dug and allowed to lie during the heat of the day so that they become warmed through, the storage house or cellar should be left open at night to permit all the fresh air possible to circulate.

HORSES, HOGS AND DOGS ARE TAXED

Billions of Securities Evade the Assessor.

UNIFORM RULE TO BLAME

Committee of the Legislature Says Burden on Tangible Property May Be Reduced by Modifying the Constitution.

Columbus, O.—By their ballots November 3 the voters of Ohio will say whether the Joint Legislative Committee on Economy and Taxation of the present General Assembly shall prepare and recommend legislation that will bring to the tax duplicates the billions of dollars worth of intangible property now evading taxation. Defeat of the proposed amendment means that the constitutional uniform rule shall continue as an insurmountable obstacle to the modernization of our taxing system.

Business-like methods in the conduct of public affairs are wanted by all the people. Business-like methods in the levying of taxes on the property of all the people constitute the goal to which this committee is working. It can ascertain and report the facts but it cannot formulate measures that will bring tax relief to the people unless the people relieve it from the century-old constitutional requirement that property shall be taxed by a uniform rule and without regard to its earning power.

The more than two hundred and fifty thousand dollars worth of dogs, the more than thirty-eight million dollars worth of horses, the more than fifteen million dollars worth of hogs, the more than ten million dollars worth of chickens—these can be taxed by the uniform rule because they cannot be concealed any more than land and buildings, farm implements and tools and machinery. Here is a tabulated presentation of all the tangible and intangible personal property now taxed in Ohio, based on the 1924 tax returns, which should command the consideration of every citizen, owner and renter.

TANGIBLE AND INTANGIBLE PERSONAL PROPERTY TAXED:

Total Number of Personal Tax Returns, 1,085,251.		
Horses	38,367,369.	\$ 38,367,369.
Cattle	52,325,880.	52,325,880.
Hogs	10,827,879.	10,827,879.
Chickens	15,769,574.	15,769,574.
Poultry	10,618,822.	10,618,822.
Mules and Asses	2,098,580.	2,098,580.
Motor and Other Vehicles	229,310,343.	229,310,343.
Household Goods and Furnishings	146,886,591.	146,886,591.
Farm Tools and Machinery	40,550,365.	40,550,365.
Farm Products	11,740,865.	11,740,865.
Motor Boats and Other Vessels	14,490,862.	14,490,862.
Office Furniture	35,785,895.	35,785,895.
Dining Machinery and Equipment	9,512,627.	9,512,627.
Musical Instruments	33,669,798.	33,669,798.
Money		
Individuals	183,234,361.	183,234,361.
Corporations	85,806,590.	85,806,590.
Other Personal Property (public utilities, etc.)	1,515,025,588.	1,515,025,588.
Merchandise	308,372,124.	308,372,124.
Lawyers	392,435.	392,435.
Raw Materials and Manufactured Articles	496,503,719.	496,503,719.
Industrial Tools and Machinery	217,454,996.	217,454,996.
Credits (notes, etc.)	366,080,737.	366,080,737.
Bonds, Stocks, etc.	181,784,291.	181,784,291.
Property Converted into Non-taxable Securities (converted too late to escape taxation)	11,950,255.	11,950,255.
Annuities	337,993.	337,993.
Dogs	253,118,650.	253,118,650.
Banks		
Total including Exemptions	\$4,272,478,580.	\$4,272,478,580.
Exemptions deducted	86,714,860.	86,714,860.
Total Personal Property Taxed	\$4,186,763,720.	\$4,186,763,720.

It is apparent that by far the larger part of the personal property duplicate is represented by tangible property.

The value of real estate, rural and urban, as returned for taxation in 1921 was \$8,063,626,905, and the entire grand duplicate was \$12,250,389,725.

The Joint Legislative Committee on Economy and Taxation is studying the tax situation as it presents itself in Ohio and is examining the tax experience of other great industrial states. It is the hope of the committee that out of the information which it is acquiring it will be able, provided the tax amendment is adopted, to propose measures which should have the effect of reducing the burden on real and tangible personal property.

TEMPERATURE OF INSECTS INCREASES WITH ACTIVITIES

As a Result of Extensive Research Work Scientist Gets New Data on Bugs.

Moscow.—The Russian scientist, M. Bachmetjew, has determined that the temperature of insects increases in direct proportion to their activity.

Butterflies, he claims, furnished much valuable enlightenment on the problem of the winter's sleep of the insect species. He found that when butterflies were placed in a colder atmospheric medium, their temperature immediately began to drop and continued on the downward scale until a certain point was reached, whereupon the temperature would suddenly shoot up again nearly to normal and then register slighter drops. But this experiment was only possible once. When tried a second time, the butterfly invariably died.

Bachmetjew came to the conclusion that the secretions of butterflies are cooled by a lower atmospheric temperature and even frozen when the lowest point is reached. The rise of temperature after this freezing point he attributes to the liberation of the animal heat during the freezing process.

This ability of insects to support a cooling down of their secretions, without actually freezing, the scientist thinks is the secret of their being able to sleep through the winter.

PINEAPPLE

A Fruit of Many Uses—Did It Put Hawaii On the Map?

If the average school girl of today is asked what she knows about Hawaii, the chances are that her answer will have pineapple in it. Most youngsters of an earlier generation, if they knew anything about Hawaii, knew less about pineapple. Trips to the corner grocery for pineapple have given many a youngster a bit of geographical information that does her good service in school.

Whether Hawaii put pineapple on the map, or the pineapple is responsible for putting Hawaii on the map, is just about as debatable a question as that concerning the chicken and the egg. Pineapples there were, of course, before Hawaii started to produce and sell them; but until Hawaii showed what really can be done with the pineapple, both in raising an unexcelled variety and in preserving it with all its original zest and flavor, few people in this country knew pineapple or used it.

Twenty-five years ago when pineapple growing was getting its start in Hawaii, the canners there put up about 2,000 cases, that is, 48,000 cans. Now the output is nearly 7,000,000 cases, or 168,000,000 cans, annually. From its insignificant beginning the industry has developed until today it is surpassed in importance by only one other Hawaiian industry, the production of sugar.

Explanation of the amazing increase in the demand for canned pineapple is found, in part, in what might well be termed the versatility of the fruit. It is equally appealing and appetizing as a breakfast fruit, as a salad, and as a desert. It is used in fruit cups and cocktails, in various salad combinations, in hot and cold deserts, such as pies. It is fine for cakes, cake fillings, frostings and sauces, and it adds a delicious flavor to punches and other drinks.

Besides, it is easy to obtain in several forms, slices, broken slices, diced or crushed and it can be bought in cans of various sizes.

Another explanation of the popularity of canned pineapple is found in the fact that the fruit, when fully ripe, is too fragile to stand shipment for long distances. It is canned only when fully ripe, and thus preserves the rich and mellow flavor of the matured fruit without the danger of injury in shipment or storage.

Early in the history of pineapple growing in Hawaii, attempts were made to ship the fresh fruit to distant markets, but they were unsuccessful because the pineapple could not be allowed to reach maturity before shipment and it accordingly lacked both sweetness and flavor.

Another Tradition Topped Over.

That old tradition that the country has it all over the city in the matter of getting fresh fruits and vegetables is fast being exploded. The truth is, the country is a hard place in which to get more than one at a time, of either fruits or vegetables. The country housewife has no variety from which to choose in planning a meal. But the city housewife can have many kinds at the same time, because they are shipped in from many different parts of the country. For this reason, canned food products are far more of a boon to the farmer's wife than they are to the city housewife. By means of them, the fruits and vegetables of all the different seasons and climates are available at any time of the year.

A Voice From the Tomb.

It is reported that Alton B. Parker is now at work on his memoirs. The assumption is Mr. Parker will include a foreword explaining who he is.—Detroit News.

Mr. Lee's Farewell

By MORRIS SCHULTZ

(© 1925, Western Newspaper Union.)

THE four Lee girls held a peculiar position in Honolulu. Their father was a Chinaman; their mother had been an American school-teacher who had converted him and married him. Lee was one of the richest men in the islands. He had brought up his daughters with every luxury.

The Lee house, almost a palace, was the resort of many a young man of wealth and position. Except for a slight obliqueness of their flashing black eyes, and a dead whiteness of skin, the Lee girls could not have been distinguished from any other wealthy and well-bred American young women. There were Dora, May, Mildred, and Estelle. Each of them had her lover, each hoped to marry, and marry well.

And there was old yellow Lee, crawling from his house to his office and back, wearing carpet slippers at home, eating with chopsticks—but he ate his heathen meals in his own room. The girls adored their father, but—

"He's so out of things," sighed Dora. "He's never learned to adjust himself, and he doesn't care."

What was going on behind those inscrutable Mongolian eyes? Lee was thinking; he was the shrewdest man in the islands.

One day he announced a dinner party. Lee's announcements amounted to commands. The four young men were asked—nobody else. There was Clavin, the young naval officer, Hershfield, whose father owned several hundred acres of pineapple plantation, Jackson, a thriving young business man, and Howard, of the civil service. The Lee girls had good sense and discrimination in the selection of their admirers.

It was a Chinese-American banquet, and the wine—Lee always had good wine—was excellent. The party grew merry. Old Lee's black eyes wrinkled up in amusement and pride as he surveyed the gathering.

What a change from the paddy-fields in which he had walked, a bare-footed boy, long years before. After the banquet a visitor was announced. It was Mr. Gregson, a local lawyer who had charge of Lee's affairs. Lee stood up. He had always hitherto spoken pidgin English—it had been so hard for his daughters to get into communication with him. But now a sort of mask seemed to have fallen from him, and his accents were as mellifluous as those of a Harvard man.

That was what shocked everybody into silence.

"Well, gentlemen," Lee began, "you have come here at my invitation to-night, and we have had a good time together. I now propose that each of you sign a marriage contract which is being drawn up. Upon your marrying my daughters, a settlement of two hundred thousand dollars is made upon each of you. My daughters are similarly provided for. If any of you gentlemen wishes to draw back—"

"No, no!" they shouted. The contracts were drawn up and signed. Another visitor was announced. It proved to be a clergyman.

"Gentlemen," said Lee, "marriage licenses have already been procured. The marriages will now be solemnized."

Twenty minutes later the four Lee girls looked blushing into the faces of the four astounded and delighted young men.

"Gentlemen," said Lee, "my home is yours for your honeymoon. All arrangements have been made. I have to go away on a short business trip. When I return, if there is anything to be discussed, it shall be discussed."

He kissed each of his daughters, who hung about his neck, shook hands with his sons-in-law, and was gone before anything more could be said.

Two minutes later a Chinese coolie, attired in a filthy cotton blouse, was slinking toward the wharf.

Three months later an aged Chinaman and his aged wife stood together on the edge of the paddy fields near Canton.

"Heaven has not blessed me with much wealth," he said, "but it has brought me back in my old age with enough money to render thy future safe, and that of our six children and their descendants."

"O Learned One, it is well to return to lay your bones in your own land after so long an exile."

"Truly, Heaven has smiled upon us," replied the old man. "So our last days shall be peaceful together, surrounded by the sons and daughters of our youth."

Chinese Are Reforesting. The Chinese province of Shansi maintains a forestry bureau that is planning to eventually reforest some 30,000,000 acres of vacant hill land and has planted 10,000,000 trees a year for several years.

Jud Tunkins. Jud Tunkins says when a man prides himself on speaking the truth there always seems to be a temptation for him to specialize on bad news.

To Be Worn a Little Longer. The clothing style makers in session at Toronto have been telling us how our next winter's overcoat will look. We already know. It will look like last winter's.—Kansas City Star.

GAS STATIONS BECOME MODERN TOLL GATES

Motorists Paying Part of Cost of Road Construction Via Gas Tax.

Nashville, Tenn., Nov. 13.—The gasoline filling station has replaced the familiar old sapling that formerly was swung down to block the public highways in the form of a toll gate.

Motorists are paying part of the highway construction expense at three cents a gallon at the filling station pump, where formerly every vehicle passing the designated spots had to plank down a quarter.

Toll gates were satisfying to traffic 100 years ago when the pioneers blazed through forested areas and established accommodation for travel, but today the state is building its own improved and modern highways.

The old toll gates in Tennessee became unpopular. Now through the red, blue, yellow and white gas filling pump, the state is netting nearly \$3,000,000 in 1925 its public highway construction fund.

RESIDENCE PROPERTY

FOR SALE.

8 room frame dwelling with electric lights and bath, good cellar located on a brick street \$2,050.

5 room frame dwelling, large lot \$1,750.

SENSENBRENNER'S
THOUGHTFUL GIFTS

"HEAVISIDE LAYER" THEORY IS PROVED
May Open Way to Great Strides in Radio.

Washington.—Existence of a "ceiling" over the earth, which exerts a strong influence on radio communication, has been established by the naval research laboratory, in association with the department of terrestrial magnetism of the Carnegie Institution, It was announced by Secretary of the Interior Wilbur.

Experiments have confirmed the long-disputed theory advanced several years ago by the late Sir Oliver Heaviside of an ionized region in the higher levels of the earth's atmosphere. It was announced. Observations indicated that the plane of maximum density, or ceiling, lies at a varying distance above the earth's surface, rising and falling as atmospheric conditions vary.

Importance to Radio.
Behind this purely scientific announcement is news of vast importance to radio development, both commercial and broadcast. It means: That the short-wave transmission field now may be opened with, in the near future, mathematical certainty as to what may be expected in transmission and reception.

That, within a brief time, the commercial radio field will expand tremendously, with moderate power, cheap short-wave stations supplanting present high-power ones with prohibitive erection costs.

That transmission and reception of broadcast programs will undergo important changes.

That fading, the bugaboo that has ruined many a fine evening, is well on the way of being overcome.

The condition is further explained as follows:

"This layer acts as a deflecting surface to electro-magnetic waves. Results obtained are based on an analysis of the phenomenon known as 'skip distance,' checked by a simple mechanical device by means of which the effective distance of the deflecting layers may be actually measured.

In seeking to account for this, a theory was developed at the research laboratory that there was a relation between the earth's magnetic field, frequency of waves used, skip distances observed and height of the layer. This relation could be and was worked out mathematically.

Joint experiments with the Carnegie Institution of Washington approached solution of the problem from a different angle, demonstrating definitely the existence of two waves, one of them arriving by way of the earth and the other by way of the layer.

"The knowledge gained will play an important part in further advancing the radio art."

Few Babies Arrive in Far North Town

Longyear City, Spitzbergen.—Bird life is prolific enough in these lonely latitudes, but a visit from the stork is a sufficiently rare event to set all the wireless apparatus in the archipelago humming.

A baby born here enjoys the unique privilege of being baptized in the most northerly church on earth (78 degrees, 18 minutes north latitude) and it was the good fortune of an Associated Press reporter to witness the christening ceremony of Baby Elgurd, first-born son of a mining engineer of the Great Norwegian Coal company.

The little wooden Lutheran Church was crowded to capacity with the entire female population of the village, hardly more than 40 all told, all in their Sunday best, and young Sigurd marked his disapproval of the proceedings in the way infants have all over the world. He was much more amiable at home, where celebrations were kept up until the small hours in a dense atmosphere of tobacco smoke and an improvised one-man jazz band.

"He will be a regular Norwegian," his mother said as Sigurd was finally borne off to bed amid loud protests.

Child's Marvelous Escape

A child was run over by forty cars at Monroe, La., and was extricated without a scratch on its body and no more than a bad scare was the result of the experience. As a freight train was passing through the town the engineer saw the child, just able to toddle, in the middle of the tracks throwing stones. He was unable to stop the train.

The time is passed when the measure of the value of a memorial is quantity. I hope the time has come when that measure is quality. I care not whether the material be marble or granite, its future will be measured by the character of the design. It is quality that has preserved for us the finest examples in painting and sculpture. It is quality that will stamp our imprint upon cemeteries of the future. Simplicity, correct lines and proportions and proper ornamentation are the real fundamentals. A design that is right, material that is lasting and perfect workmanship, spells success for the future of this industry and the beautification of the cemetery. Will you let me help you select the memorial for your lot. Call at show room. **NO AGENTS.**

**Fur Coat Problem
Is Hard to Solve**

**Milady's Task Is to Select
Garment That Will Give
Best Service.**

The fur coat problem is a little different from any other perplexity that the mode supplies and a lot different from what it was in the earlier years of this enlightened century. There was a day, observes a fashion writer in the New York Herald-Tribune, when the distinction of the fur wrap depended merely on its particular skin—"my sable," or "my seal" immediately classified the speaker in the ranks of the haute monde, entirely regardless of the silhouette or details of her epochal acquisition. The life of any particular model was measured by the durability of its pelt and the same fur coat would appear and reappear for several seasons, serenely disdainful of fashion's severest evolutions.

Granting that the fur coat has fallen completely under the dominion of the mode, what general principles are to govern its selection and what are the specific details to be considered this season? Surely it is unsound economically to add a new fur wrap to each winter's wardrobe and yet, if fashion dictates seasonal changes, what is the alternative?

The ladies who light-heartedly acquired straightline coats last winter are weeping and wailing this flaring autumn and what warranty is there that this year's modish wraps may not be consigned to the dim indubitable past in the winter of 1926-27.

The Invariable Flare.

The problem can only be solved in one way. A skilled analysis of the situation must be followed by a carefully worked out compromise—and this is the single instance where fashion permits a compromise. It is not so much a question of the moment's mode as it is of the current style cycle. Tomorrow is quite as important as today and with this consideration in mind we shall forthwith point out the middle path to pelted smartness.

The silhouette is far and away the most important consideration when acquiring a new fur wrap because it does not lend itself easily to the skill of the remodeler and because all through the mode it is the first detail to attract the eye. Last year in our fur coat analysis, we advised forsaking the straightline in favor of a moderate flare and at the same time predicted that the flare would entirely dominate the fur wrap of 1925-26. That forecast has been sweepingly realized and the flare is the inalienable mark of furred chic this season. Clearly no model that is to bear this year's vintage can omit the flare or even adopt it in a half-hearted imperceptible version. And yet it is questionable whether the extremely flared interpretations will not look the least bit faded when next autumn comes.

A Compromise Verdict.

So for your new fur coat we counsel the flare with a grain of discretion which means that you are not to adopt the extreme or bizarre models and that you are to concentrate more on general fullness than sudden width at any specific point. Last year when we suggested the moderate flare it was considered radical advice; but year it has become conservative. But while

Natural Krimmer, Tight at Waist,
Flaring at Sides.

careful analysis leads definitely to the conclusion that graceful width is to dominate fur coats next season, as well as this. It may take a distinctly different form. And so it would be unwise to commit yourself to any extreme translation of the flare. Choose the middle path and you will combine smartness and security for a happy compromise.

There is a single exception to the flared idea in fur wraps and that is in the sports or trotteur models. Every other type indorses some species of flare. Some of these originate at the shoulders and simulate a cape back but mostly they swing from a narrow hipline into front and side godets. Cape effects are most popular for the afternoon—the mode du soir, although not disdaining the cape silhouette, shows a distinct preference for sleeved models.

houette, shows a distinct preference for sleeved models.

The fur coat flare is effected in as many ways as it is on dresses and cloth coats. The flare may be achieved by the godet, by the circular flounce or by the gathered straight flounce. The flounce may appear at the front, the back, at one or both sides, or all the way round the coat. Then, too, the distended effect may be arrived at through patches of fur applied to the coat in such a manner that a flare results. Less usual methods are through gathered in-set sections, inverted plaits, inset panel sections which extend into a border or the cutting of the coat on graduated circular lines.

Length of New Fur Coats.

The next consideration concerns the length of the new fur coats. The models of the current season reach either to the hemline of the dress or terminate an inch or two above. Either is satisfactory this year, but, delving once more into the future, which is preferable? There has been a tendency

Coat of Muskrat Pelts. Irregular Hemline Is Featured.

this autumn away from bizarrely short skirts and there are indications that by next autumn that tendency may be further accentuated. Furthermore the flare in a longer model adds more dignity to the general effect and inasmuch as there are sign posts which point to a return of at least the ghost of the old-time elegance, our suggestion is that you choose the longer models, everything else being equal. The ideal fur coat length should be about thirteen inches off the ground.

Collars, cuffs, and the various other details that differentiate this winter's fur coats may be adopted with no fear that next year shall find them demodes. Collars and cuffs each show a predilection for the flared silhouette and they are invariably full. Among the former, shawl collars and chin effects share the spotlight while flared cuffs often add the finishing touch to a liberally constructed sleeve.

Further smart details that mark the fur wrap of 1925-26 are the cape-back, either in one piece or slashed at the center back, all-around cape effects, front borders that form a long trimming from collar to hemline, bolero effects, scarf collars, standing collars and wide revers of contrasting fur—the revers cut in one with the collar—a wide flounce that continues up the center back of the coat, gradually becoming narrower until it disappeared underneath the collar.

Fur Coat Linings.

Fur coat linings may be very ornate or quite sober. Smart sports coats of fur are frequently lined with kasha while more formal models often feature hand-embroidered silk linings or hand-painted linings depicting jungle scenes.

The reversible coat composed of cloth on one side and fur on the other and the fur-lined coat play an important part in this winter's models. Leopard, gazelle and burunduki are the furs most in evidence with this type of wrap.

So far as the pelts are concerned you may choose from this year's offerings with perfect equanimity and assurance that you will remain in the picture next year—and if necessary for several following years. There are, of course, certain sharp distinctions drawn in the character of the skins to be worn for the different occasions. For afternoon wear, flat furs are easily smartest and moleskin and caracul are the two outstanding leaders in this class. The first is bleached and dyed in numerous colors, leaning principally to beige, golden brown and mahogany. Caracul comes in the more sedate hues of grey, black and brown. If you will invert that order you will have about the correct order of color frequency for the fall and winter seasons. Grey is newer than either brown or black but we suggest that the frugal budgetaire confine her spectral fancy to those two ancient favorites. And of the two our preference is for black. Mink, broadtail, baby lamb and antelope are also en regle for daytime wear.

For sports wear—the sports fur wrap comes in short and three-quarter lengths—leopard, krimmer, nutria, kolinsky and muskrat lead all the rest.

Big Job

Little Ella Latham was trying to read and at the same time take care of the twins while her mother was downtown shopping. Finally she had to give up her reading, and looking at her two noisy charges exclaimed in disgust:

"Twins is just naturally too much!"

Wonderful Creature

A strange and beautiful creature with a body somewhat like a zebra and a horned head resembling that of a giraffe, has been obtained at Irumu, in the Belgian Congo, with the aid of pygmies.

Well?

"The women say they are going to sweep the country."

"All very well. But are we men classified as trash?"

Her Recognition

Small Elizabeth and her mother were walking down the street when they saw an urchin approaching them. Elizabeth stuck out her tongue. When they had gone on, her mother inquired "Why did you stick out your tongue at that little boy we just passed?" There was a pause while Elizabeth considered. "Why?" she replied, at length. "Why, mother, to show him I recognized him!"

Knew His Wife

Jones was a chemist, and when his wife ran away with another man he inserted the following advertisement in the local paper: "This is to notify the party who so kindly relieved me of my wife that I can supply him with liniments, bandages, arnica, healing salves, absorbent cotton, iodine, sleeping powders, and crutches at rock bottom prices."—London Tit-Bits.

LOANS up to \$500

A spirit of partnership enters into most City Loan transactions. It is virtually a case of "we furnish the money and you run the business." The big difference is that the borrower gets the best of it because he does not have to divide the profits "fifty-fifty." Thousands of these partnerships are formed every year under the popular City Loan plan—with satisfaction and profit to all concerned. There are many advantages to be gained by dealing with an institution as well-established and reliable as the City Loan.

AMUSEMENTS
Farce comedy on the screen will never be eclipsed for Douglas MacLean has reached the very pinnacle of achievement in this type of photoplay in his latest triumph "Introduce Me" at the Metropolitan theater.
It also represents a climax in the career of this youthful star whose winning smile has won him first place among screen comedians for all time to come. He gave the best performance in this masterpiece of ingenious fun.
The picture opens with scenes on the beautiful boulevards of fashionable Paris with the irresistible Douglas and a friend touring France in the best American fashion. In a railway station, Doug sees Betty, "the prettiest girl in the world," and falls in love at first sight. His friend manages to meet the girl and then refuses the youthful hero an introduction. This starts the fun. From here on the picture travels a fast and furious pace leading to the situation where Douglas is forced to pose as America's greatest mountain climber at a little chalet in the Swiss Alps. Torn between love of Betty and fear of the mountain, the picture moves thru a riot of funny situations leading up to the thrilling climax—the ascent of the peak itself.
Chased by a bear, dangled over precipices on the end of a slender rope caught in an avalanche and poised in pinpoints of rock, the youthful hero wins the race to the summit of the mountain against all adversaries.
His trips down the mountain side is enough to cure a three weeks' grouch in three seconds. Douglas is accidentally rolled into a giant snowball which crashes over the cliffs, knocks down trees, leaps bottomless chasms and finishes—but to tell the end would spoil the picture.
Anne Cornwall, who plays the leading feminine role, is by far the most attractive young lady who has ever appeared opposite the star. The picture has a smoothness and finish which reflects great credit on Director George J. Crone. It was supervised by Al Santell while the excellent photography thruout was the work of Jack Mackenzie and Paul Perry.

Selling Nest Eggs
By CLARA DELAFIELD
(© 1923, Western Newspaper Union)
"WELL, what d'you want me to do with 'em?" demanded Klaus, the grocer, aggressively. "I can't lay 'em over again for you, can I?"
Little Mrs. Phillips faced him with blazing eyes. "Three of those eggs were bad," she answered, "and that means that there's chickens in the other nine. I didn't pay you forty cents a dozen for bad eggs."
"I didn't guarantee them eggs," retorted Klaus, who was as hot-tempered as his customer. "If you bought nest eggs, that's up to you. Guaranteed eggs at sixty-five."
"Will you take them back, or won't you?"
"Be darned if I will," said Klaus. "You needn't look for any more custom from me."
"Don't want you. Your trade isn't worth a darn," said Klaus.
Little Mrs. Phillips went home biting her lips. She was not the sort to sit down under an insult. She vowed that Klaus should pay for it. Klaus, fiery as he was, was an easy-going man in many ways. He never bore a grudge. Mrs. Phillips did. And the two were old enemies.
She was in Klaus' store next day as sweet as honey, buying sugar and tea and coffee and cheese—but no more eggs. Neither made any reference to the past. Klaus soon forgot.
Little Mrs. Phillips smiled as she looked at what lay in a warm corner of the kitchen, the temperature gauged just right. She took all the trouble in the world to hatch those eggs. And when, nearly two weeks later, nine fluffy little chickens emerged, she felt that triumph was at hand.
The chickens grew into fowls, as chickens will. They were white Leghorns—a valuable breed. One day little Mrs. Phillips arrived outside Klaus' store with three cockerels. Klaus had a meatshop annex.
"Want some chickens?" she asked. Klaus set a price on them. "Didn't know you was raising chickens, Mrs. Phillips," he said.
"They say it pays, and I'm trying out a few," answered the little woman. "Yes, that will be satisfactory."
She laughed as she pocketed the money. "Remember one day six or seven months ago you sold me some nest eggs?" she asked.
Klaus, who had forgotten, looked at her sheepishly. "Oh, I guess that was just a misunderstanding, Mrs. Phillips," he said. "No ill-feeling on either side."
"Not the least in the world," Mrs. Phillips returned. "Only those cockerels hatched out of those eggs, Mr. Klaus."
"Well, I swan!" ejaculated Mr. Klaus. "Kind of a come-back, Mrs. Phillips."
"Oh, it's all in a friendly way, Mr. Klaus," she answered. "I guess I owe you a good deal for selling me those nest eggs. I meant to get even with you and hatched them out, and that's what turned my thoughts toward chicken raising."
"Well, I swan!" said Mr. Klaus. "That's what I call real enterprise—yes, indeed, Marm."
"By the way, my hens are beginning to lay," said the little woman. "I suppose you don't want any eggs?"
"Why, yes, I can always use eggs, Mrs. Phillips. How many did you happen to have?"
"Oh, I can let you have a dozen tomorrow," said Mrs. Phillips.
She arrived the next day with a dozen eggs in a basket. Klaus bought them. He did not ask if they were new-laid. He took it for granted. But it was a fiery-faced grocer whom Mrs. Phillips encountered the next time she went into his store.
"Doggone it, Marm," he exploded, "them eggs you sold me was all bad. My best customer bought 'em from me—Mrs. Cohen—and she's been raising Cain about 'em."
"I'm sorry, Mr. Klaus," said little Mrs. Phillips sweetly, "but you see they weren't guaranteed. You don't want me to lay them over again for you, Mr. Klaus, do you?"
Klaus' thin lips went up into a sneer. "So that's the game, hey?" he demanded.
"That certainly is the game," responded Mrs. Phillips sweetly, as she left the store.
But the cream of the joke would come two or three weeks later when Klaus began to discover that he couldn't hatch those eggs. They weren't the kind that hatch.
That was why Mrs. Phillips had sold the cockerels.

Water Power Increased 10 Per Cent in Year
Washington.—An increase of over 10 per cent during the last year in the number of horsepower developed in waterways of the United States is noted by the geological survey in a report showing the developed and undeveloped waterpower of the nation. Water wheels installed in plants of 100 horsepower or more had a capacity of 10,938,655 horsepower, an increase of 951,000 over the power developed last year, the survey's report showed. Of this increase 939,000 horsepower, or 99 per cent, was in public utility power plants and 12,000 horsepower, or 1 per cent, in manufacturing plants.
In New York State there were 528 plants in operation on March 1, 1925, with a total capacity in horsepower of 1,713,551. Of these plants 350 were public utility and municipal units, while 178 were manufacturing plants. Of the potential water-power resources of the country the survey's report showed that New York has 4,010,000 horsepower available 90 per cent of the time and 4,960,000 available 50 per cent of the time.

HAPPENINGS IN OUR STATE
Taken Direct From Wires By Correspondents of the United States Press Association.
(United Press)
Dayton—Handicapped in his fight for life by a recent operation, Congressman Roy G. Fitzgerald, of Dayton, Ohio, run down by an automobile driven by Mrs. C. C. Adler, wife of a merchant, hovered near death Monday, Fitzgerald's skull was fractured. He was struck while crossing the street near his home.
—
Delaware — Missionary work is making a distinct contribution to the welfare of the world and to the mutual understanding of the races of mankind. Dr. Thomas Jesse Jones, educational director of the Phelps-Stokes foundation told the Board of Foreign Missions of the Methodist Episcopal church in session here Monday.
Dr. Jones was chairman of two commissions of educators and scientists who recently made a survey of educational work in Africa, resulting in enlarging missionary work on that continent.
—
Columbus—Appropriate observance of Thursday, November 26, as Thanks giving day, is urged in the annual Thanksgiving proclamation issued by Governor Vic Donahey.

FIND OIL IN OKLAHOMA AFTER MANY FAILURES
Early History of the State Is Filled With Many Disappointments.
Tulsa, Okla.—Where years ago the North American Indian roamed the hills of eastern Oklahoma and the broad prairies of the western section, oil wells now appear, bringing to the surface the "black gold" for which eastern Oklahoma is famous.
The first well in Oklahoma was drilled in 1884 by Michael Cudahy of Omaha, Neb. When the well was at a depth of 1,120 feet, an oil sand was penetrated and there was a small showing, but not in paying quantity. The drillers were instructed to drill deeper, but at 1,800 feet, with no further trace of oil, the well was abandoned.
The showing of oil led many prospectors to Oklahoma, although as late as 1891 only 30 barrels of oil were produced. But there was considerable drilling.
Production continued to slump the next two years, only ten barrels of oil being produced in all of Oklahoma territory in 1898, but it increased to 6,474 barrels in 1900.
A well sunk just outside of the city of Red Fork in 1901 proved to be one of the largest producers, and caused many "wildcat" wells to be put down. The big oil play started in 1904, however, when the Glenn pool was uncovered.
From a small Indian trading post, Tulsa became a city of 7,000 in a year. Oil offices were brought to the city, hundreds of persons became wealthy from oil and built fine homes, stores, factories and all types of business establishments sprung up. Tulsa today is a city of 125,000 people in a state producing 460,000 barrels of oil daily, with indications it will go higher.
The year the Glenn pool was discovered, production was recorded at 1,300,000 barrels for the year, but the search for oil did not end there. It was found in the northern, central and southern portions of the state.
The northern miscellaneous fields have proved to be the heaviest producers. The southern and northern fields come next. The Garber field in north central Oklahoma, is the most promising, in the opinion of oil men, as there are 15 sands, which virtually assures the driller a producer at some depth.
Wells range from 1,000 to 4,400 feet in depth. A few wells are now drilling with a view to going below 5,000 feet.
ELECTRICITY TO DO WORLD'S HARD WORK
Electricity costing about one-fiftieth of the present price is coming, predicts the scientist, J. B. Haldane, says Capper's Weekly. Then "to light a lamp as a source of light will be as wasteful as to burn down one's house to cook a pork roast." In England, where Mr. Haldane lives, he thinks the power question will be solved by covering the country with rows of metallic windmills working electric motors, which in their turn will supply current at high voltage to great electric mains.
At suitable distances will be great power stations where, during windy weather, the surplus power will be stored by an electrolytic chemical process and made to run motors as needed. In time to come all the hard work in the house or on the farm will be done by pressing a button.

Oil Among the Ancients.
The oil industry had its birth in the United States about 1858, when crude oil was analyzed and a well was drilled at Titusville, Pa. But our Indians and the races before them knew crude oil. Thousands of years before Christ Babylonian and Chaldean masons used it in semiliquid form for cementing the bricks of their towering walls, and it was used in building the pyramids. Herodotus mentions a well from which three substances, asphalt, salt and oil, were pumped. Oil from natural springs in Sicily was used in lamps in the temple of Jupiter at Rome, and the wealthy illuminated their homes with it. The ancient Chinese and the Persians used it for light and heat, and it enters into the preservatives of the Egyptian embalms.—Scientific American

Boss Was Guilty
On returning home from my vacation, I found that a simple set of files that I had, supposedly, left for the office boy to take charge of, was all muddled up. With utter disgust in my voice I said to the office boy, in front of my boss, "Why a baby could keep these files straight."
Can you imagine my embarrassment to hear the boss reply, "I kept those files, Miss Stone."—Chicago Tribune.

AMERICAN HOSPITALS

Are Still Crowded With World War Wounded.

Washington, Nov. 13.—(UP.)—The World war ended seven years ago but to 26,430 veterans in American hospitals the war still continues a battle for life.

A few of the former service men in the 51 Veterans' Bureau hospitals will be discharged today as cured. That event to them is a real armistice fete. Others are winning their long fight for health, but many maimed, shell-shocked and diseased—will spend the remainder of their days being cared for by the government.

Veteran hospitals have cared for 500,786 patients since the war. Some of the first cases of disfigurement are still under treatment. At Walter Reed hospital here, one veteran has been operated on 49 times and another 27 times. Both are preparing to undergo several more surgical treatments.

Vocational training has fitted 109,690 ex-service men to compete in industrial activity. Rehabilitation of these veterans who suffered from the war cost the government \$6,020,000.

Compensation paid to veterans and their dependents since the armistice totals \$754,934,000. The government is paying an average of \$12,500,000 monthly to the former service men who were partially or wholly disabled and to their dependents.

Twenty-nine thousand men who fought under the American flag in the war have "passed on" since January 1. To the dependents of these heroes Uncle Sam has paid more than \$9,450,000 in adjusted compensation.

The veterans who were only entitled to a cash "bonus" of \$50 or less because of their short time in the service, have collected \$3,138,233.46 this year.

Through the establishment of a "sinking fund" the government plans to pay former service men about \$4,000,000,000 in the next 20 years through adjusted compensation.

Insanity has been the most terrible of the war's aftermath. There are now more than 12,300 World war veterans being treated for mental diseases caused mostly by shell shock and fever.

SECRETARY OF STATE THAD BROWN

Is Endorsed For Governor By Franklin County Republicans.

Columbus, Nov. 13.—(UP.)—Resolutions adopted by the Franklin County Republican Central Committee, endorsing Secretary of State Thad H. Brown for the Republican nomination for governor, were made public by Brown today.

The resolutions declared the committee "gives its unqualified endorsement" to Brown and urged "him to become a candidate for governor. The resolutions then pledged the committee's 'unswerving support to Brown in the end that the Republican party may again restore Ohio to its ranks.'"

When a man has an opportunity to become a hero he is usually busy at something else.

Glory is sweet when our heart says to us that the wreath of honor ought to grace our head.—Krummacher.

Parents must look for the greatest appreciation by their children when the children are thirty or forty years old.

Presidential Rulers

A recent estimate states that there are now 83 governments in the world and of these 36 are ruled by Presidents, including provisional Presidents and presidents of senates that are heads of states.

 "I hope this expulsion of ours isn't going to injure me socially," remarked Eve ruefully.
 "Oh, I think not," returned Adam calmly. "Nothing of the sort can prevent us from heading the list of first families, you know."

SAVE THEM

FICKARDT'S ROUP AND CHOLERA DROPS
 The Year-Round Poultry Medicine. Whenever Fowls Are Sick, Use It. A Perfect Remedy for White Diarrhea, Coccidiosis, Bowel troubles, Limber Neck, Roup, Swelled Head, Chickens Fox and a Preventative for Cholera and Typhoid.
DEADLY ROUP.
 Baltic, Ohio, R. F. D. 2, October 20, 1924.
 F. L. Fickardt.
 Dear Sir:—
 Send me at once two bottles of your Poultry Medicine. Enclosed find one dollar.
 Baltic, Ohio, Dec. 24, 1924.
 Mr. Fickardt.
 Dear Sir:—
 A few words in regard to your Poultry Drops. My flock had a sneezing cold that developed into **Deadly Roup**. After I began with your medicine I lost only a few birds which were badly infected, the sneezing in the rest of my flock began to disappear.
 In a few weeks' time there was a great difference in my flock of 200 English Leghorn pullets; they began to develop and get red combs and wattles. I am sure Fickardt's Roup and Cholera Drops will help in egg production, for a healthy bird is bound to lay if it gets the proper feeds.
 Yours respectfully
 Elmer Raber.
Prevention Is Better Than Cure.
 Ashville O. R. No. 2, August 14, 1925.
 Dear Mr. Fickardt:—
 Mr. experience in the use of Fickardt's Roup and Cholera Drops has been more than satisfactory and since the time that I began to use it, years ago, I have never had an epidemic of any kind. No white diarrhea, gapes, roup, nor any of the diseases common to fowls.
 Sincerely,
 S. W. Cummins & Son.
 Price 50c.
F. L. FICKARDT
 Manufacturer
 Circleville, Ohio.

Would Seem Last Word in Submarine Travel

Mr. Harold J. Dartnall, a naval architect of Southampton, England, has invented a submarine investigator, a form of craft similar to a submarine. It is, however, much smaller, and can be constructed at a small cost.
 It possesses the power to run on the surface, to dive to any desired depth and run level there, and return to the surface at will.
 The necessary illumination for seeing objects at such depths will be provided by powerful electric lights on the outside of the "investigator." One for examining the suitability of the sea floor for resting will, of course, be inside, and show through the glass observation floor at the bottom of the vessel.
 Telephone communication with the towing vessel will be provided.
 It is claimed that the craft will be of great value in obtaining marine photographs, specimens of life by means of trap nets, and in directing salvage operations beyond the depths at which divers can work.

CASH BUYERS FOR FARMS.

We have cash buyers for several small farms located in Pickaway county. These are buyers for homes and will pay a good price because of this fact. Also, we have some very desirable rental property for trade for farms of any size.

RAP TAKEN AT WINE

Issued For Sacramental Purposes—Quantity Reduced From Three to One Million Gallons.

Washington, Nov. 13.—(UP.)—New treasury regulations restricting the issuance of sacramental wines to less than one million gallons annually have been drafted by Assistant Secretary of the Treasury Andrews, prohibition czar, and will be sent out to enforcement officers this month.
 Investigation of the more than three millions gallons of sacramental wine withdrawn in the last fiscal year has shown that less than one fourth of it was used for sacramental purposes, treasury officials said today.
 Detection of a dozen different schemes of obtaining "sacramental wine" fraudulently, led to the drafting of the new regulations.
 Some bootleggers grew heavy beards and posed as orthodox rabbis to obtain withdrawal permits and others established fictitious Jewish congregations. Others did not even take this much trouble.

Cattle Thieves Sell Steer to the Man Who Owned It

Brooks, Alta.—Arrested in the act of skinning a stolen steer, two farmers in the Brooks (Alta.) district were recently sentenced to two years less one day in Lethbridge jail, with hard labor.
 Their arrest was the result of detective work by a local constable, who received information which led him to believe that one of the pair who had been for some time suspected of cattle killing was about to deliver beef to a hotelkeeper. He watched the suspect's place for two days, and when the two accused left the place one evening with a car, the constable followed on horseback, but had to return, not being able to keep track of the car in the dark. The two returned at 1 a. m. with a carcass of beef, and were later in the morning arrested with the beef in their possession. The stolen steer turned out to be the property of the hotelkeeper to whom it was being sold.

OCEAN DERELICT AFLOAT TWO YEARS

Abandoned in 1923, Still Menace to Shipping.

Washington.—Men who go down to the sea in ships are speculating about the early appearance in West Indian waters of one of the most noted derelicts of modern times.
 While the Navy department's hydrographic office considers it unusual in these days of rapid radio communication and special coast guard patrol for a derelict to remain afloat longer than a week, the four-masted British lumber-laden schooner Governor Parr has been roving the high seas for nearly two years.
 The last definite report received of the Governor Parr's whereabouts was in October of last year, when she floated crewless down along the coast of Africa, but the British steamer Tortugero late in July sighted a derelict 300 miles northeast of the Virgin Islands.
 If this proves to be the Governor Parr, which seems likely, it will be the first derelict on record in the hydrographic office to cover practically the circulatory drift of the North Atlantic.
 The Governor Parr set sail from Ingramport, N. S., for Buenos Aires on September 27, 1923. She encountered rough seas and lost two of her masts. On October 3, 1923, the American steamer Schodack took off the crew. Floating in the transatlantic shipping lanes, with a cargo of a million and a half feet of lumber, the derelict was picked up by the coast guard cutter Tampa early in January, 1924, and was headed for Halifax. Due to rough weather and the weight of the waterlogged vessel, the derelict was cast adrift.
 In August of last year seamen from the British steamer Zaria sighted the Governor Parr and boarded it, setting it adrift. She apparently survived this experience, for later she was reported off the coast of Portugal, and in October last off the coast of Africa, near the Canary Islands.
 If the Governor Parr has continued to remain afloat, men conversant with oceanic conditions believe it would likely be carried by the northeast trade winds and the north equatorial current across the tropical north Atlantic, and probably will be next sighted near the lesser Antilles.

Devotee of Lamaism Has Simple Belief

The biggest word in Lamaistic nomenclature is circumambulation—the philosophy and simplicity of simply going round and round some infinitely holy object.
 Some religions are comparative. Lamaism is entirely and completely round. The devotee of this mystic system spends his life on earth going round something and turning round, and his life in hades continues the unending movement, the wheel of transmigration, says the North China Herald.
 The poor Tibetan, morning, noon and night, with his hands and feet and brain is eternally going round and round. He walks round sepulchers, cenotaphs and holy symbols; he walks round stone heaps, temples and mountains; he will patiently and laboriously and persistently circumambulate any and every holy object and while doing so manipulate his rosary in one hand and turn his prayer wheel in the other.
 Whoever invented and perpetuated this form of religion bequeathed to the inhabitants on the roof of the world a system at once so simple and ingenious, so satisfying, and accommodating, so free from hypothesis and argument, that the Tibetans have adopted it en masse and now spend the greater part of their lives walking round some sacred edifice, firmly believing the more they go round in this life the less they will go round in the next.
 Imagine Dean Inge spending 40 years walking round St. Paul's cathedral, or Bishop Trenchard passing his days circumambulating Lake Chad. If it were not so absolutely serious and so pathetically hopeless, this whole system would seem utterly ridiculous.
 There is a wealthy Tibetan temple in Tachienlu, situated quite near the riverside. An old man nearly seventy and an old woman just around the same age spend their days walking round this building. The old man's lips mumble "Omni-pa-mehum," the old man's head turns Omni-pa-mehum, and the old man's legs walk round Omni-pa-mehum. We occasionally meet him and he smiles but keeps on forever going round and round. His rosary tells him how many times he has prayed and how often he has circumambulated the holy temple.
 Circumambulation is considered one of the most meritorious and indispensable duties in the Lamaistic religion and is performed sometime, somewhere, by everybody in the forbidden land.

New Sun Dial Accurate

Although sun dials have been satisfactory in a general way for giving the hours, a new one has been invented that tells time to within 30 seconds. Hands are geared to the dial, which has an additional part through which a ray of light passes. The dial is improved also to correct for different positions of the sun during the different seasons, allowing for the equation of time of the amount of time the sun is ahead of or behind its average position. The inventor is Prof. W. E. Cooke, an astronomer of Sydney, Australia.

Will Be With Us Forever.

The last clipper ship has gone out of commission, but that does not imply that windjamming will cease by sea—or land, either.—Pittsburgh Gazette-Times.

Six Reasons Why You Should Buy a Stetson

STYLE:

Stetson is the foremost creator of hat styles in the world, each season setting the pace with a sweeping variety of correct shapes and shades—a Stetson to suit any head or face.

QUALITY:

The blending of flawless materials and deft workmanship gives Stetson its supreme quality—a maximum of wear and beauty or finish.

MATERIALS:

Stetson Hats are made of fur cut from the choicest selection of Beaver, Nutria, Hare and Rabbit skin. The silk bands and bindings are woven by Stetson; the leather sweatbands are especially selected.

DEALERS:

The franchise to sell Stetson Hats is given only to the best stores of each community. The Stetson dealer renders a real service to the man who wants a hat that is both smart and becoming.

WORKMANSHIP:

Workers of the highest skill, in a model factory, blow and blend the fur, and felt it into hats unmatched anywhere. Each Stetson hat is shaped by trained experts—by hand.

VALUES:

Judged by style, quality and wear, a Stetson gives you more value for your money than a hat of any other fine make in the world.

Heat with Distinction

At last it is proved that a home heater can be good looking—ornamental, if you will—as well as a practical heat-producing utility.

The Mueller Furnacette marks the greatest advance in home heating equipment since the invention of the heating stove. It is the joint creation of master furniture designers and skilled heating engineers. There is distinction in every line of its well-balanced, walnut-grained, vitreous enamel cabinet.

And as for heat—never was there an above-floor heater of any kind that could compare with the Furnacette in heating efficiency! It heats the whole house by continuously re-circulating warm, moist air thru all the rooms. It provides more comfortable, more uniform heat than two or three stoves combined, yet uses no more fuel than an ordinary heating stove.

Sold on convenient monthly payments.

Wrong Number

When Frank Harris last visited New York he was very much put out by an attack on one of his books.

"Only ignorance and misunderstanding," he said, "can see viciousness in this book. Its critics remind me of a story.

"An old farmer and his wife halted in a picture gallery before a painting of Adam and Eve.

"Who's that brazen hussy?" said the wife.

"The farmer turned to his catalogue, but got the number wrong.

"Queen Victoria," he read out, 'receiving General Grant.'"

16,000 GERMANS FIGHT FOR FRANCE

Help Former Foes Battle the
Rifians.

Paris.—Once enemies at arms, 16,000 Germans—exactly half the total strength of the French Foreign legion—are in Morocco fighting the battle of France against the rebellious Moorish tribesmen.

Applications from former German soldiers to be permitted to lend their aid to their former enemies in the warfare against the Rifians are coming in such numbers that it is impossible for the French ministry of war to accept all of them.

The Foreign legion, to which the Germans are attached, has been in the thickest of the fight since Abd-el-Krim, the Moroccan war lord, began his offensive, and French officers assert that the Germans have given a good account of themselves. They battle in the manner of the trained soldiers they are, and it is said that the percentage of desertions of them to the enemy ranks is not larger than that among the other nationalities represented in the legion.

Two Boys, Digging, Reveal Old Ruins

Washington.—An interesting ruin of a prehistoric building has recently been discovered in New Mexico, near the Gran Quivira National monument in the south central portion of the state. Word has just been received at the Department of the Interior that two boys of the neighborhood, seeing a slight elevation of the ground at this point, became curious and started digging into it.

After digging down about eight inches the top of a wall was reached, made of rocks. The rock extended about twelve inches, and from there on down the wall was of adobe. Excavations were followed only to a distance of about three feet.

It is estimated that the walls of the newly discovered building will measure about one hundred and fifty-nine feet from north to south and about ninety feet from east to west. In the course of their digging the boys brought to light some pottery and food bones.

The Gran Quivira National monument was reserved by Presidential proclamation in 1909 to preserve one of the most important of the early Spanish mission ruins in the Southwest. Ruins of ancient pueblo dwellings are also contained within the monument boundaries.

PREFERENCE IS FOR "CAVE-MAN" HUSBAND

Modern Girls Seem to Favor
Strenuous Type.

Answers to a questionnaire circulated among 1,000 college girls of the Middle West are said to show that 65 per cent of them think that the ideal husband should be cave-mannish, but in a "refined" way. These responses would be more illuminating if they were more complete. It is a common failing of questionnaires to elicit everything but the one thing most persons would like to know.

It is not at all clear what kind of cave-man the "refined" variety is. Of course some of the things not to be expected of him are apparent. He is not supposed, in the pet phrase of professed wife tamers, to "Catch 'em young, treat 'em rough and tell 'em nothin'." It is to be presumed that he may be entirely ruthless in seizing the weekly pay check, dragging it home and hurling it into his wife's lap. On occasions he may even be cross with the janitor—especially on cold mornings when the steam is low—and he must not allow landlords to browbeat him when it comes time to renew the lease.

Undoubtedly he is not to be a perfect amoralist. In primitive times when the troglodyte had wooed his mate with a budgeon and carried her insensible to his lair it was not denied that he might afterward comfort her with such endearments and tenderesses as occurred to him. Yet in idealizing the qualities a refined cave-man should have 75 per cent of the girls say he must not be a petter and the other 25 per cent say he may pet moderately but must not indulge outside the home.

The refined cave-man must neither drink nor smoke. In physique he must be muscular. There is grave doubt whether he should be a social worker, 60 per cent of the girls fearing that he might thereby become a "sissy." Above all, he must not be flirtatious where other women are concerned.

From all this it appears that the refinement and the cave-mannishness are subject to qualifications. Happily the 1,000 prospective husbands of these 1,000 college maidens need not be cast down. The probability is that while few of them will prove 100 per cent up to expectations at the outset of the matrimonial journey, the dear girls will train them so to be before the voyage is ended.—New York Sun.

Crook's High Life Ended

That persistent individual who for more than ten years has been wandering about Europe, posing as "the bishop of Warsaw" and collecting board, lodging, alms, loans, raiment and reverence from the pious, has been arrested in Rome. His smooth speech and commanding presence had enabled him to impose himself on his victims and escape detection, despite the fact that he had been formally denounced by the Vatican and the police had been assiduously on his trail. His name, it appears, is Tarvoski. He was born in Lemberg, a peasant, and his profession, when he is doing honest labor, is that of a cook. But since taking up his avocation of "bishop" he has slept in many a soft bed and eaten many a fine meal as the guest of highly placed personages.

Only a Dream

The late Max Hirsch, the noted New York theatrical manager, had a fine library and a fine literary taste.

Mr. Hirsch dined with Michael Arlen, the popular but shallow Armenian novelist, during the latter's visit to New York, and in the course of the dinner Mr. Allen, relating his life story, said:

"So I woke up one morning and found myself famous."

Mr. Hirsch gave a loud laugh. "You mean," he said, "you found yourself famous, and then you woke up."

Once Rich Woman Works to Keep Child

Boston.—Facts pertaining to "the mysterious disappearance" of Harold Lawton, scion of a prominent family and son of the late Superior Court Judge George F. Lawton were made public by Walter L. Badger, counsel for the seventeen-year-old daughter, Laura, who is objecting to the probate of the will of her grandfather which cut her off from the \$75,000 estate with the sum of \$500.

A school teacher, Gladys Dunbar, was partly the cause of Lawson's desertion of his wife and child six years ago, the counsel stated. As a result of the desertion, Mrs. Harold Lawton, receiving no aid from her husband's people, was obliged to give up her cultured home in Winchester and go out and work as a domestic in order that she might keep her little girl with her.

Both sides have announced their intention to fight to the last straw over the will. The father of the little seventeen-year old girl whose desertion caused untold suffering to her and her mother, is believed to be dead and therefore, her counsel states, she is entitled to her share in grandfather's estate.
